

AMI Teachers Transform Lives One Child at a Time. You Can Be One of Them.

Many can choose teaching, but it takes someone special to become an AMI Montessori teacher.

Someone who wants to support each child's natural development. Someone who helps them build their capability to become a productive, fulfilled adult who contributes to the world. Someone who is not content to just teach content, but intent on helping a child become a lifelong learner and doer.

Association Montessori Internationale (AMI) trains teachers worldwide.

AMI advances the transformative approach of Dr. Maria Montessori to help all children become truly capable individuals by focusing on their moral, behavioral, emotional, and intellectual development.

AMI training addresses why you want to teach and shows you how.

AMI provides intensive, hands-on Montessori training that moves you to greater impact by starting at the core of transformational teaching. We provide the framework and tools for successful teaching that works for each child, regardless of their socioeconomic status. Learn how to personalize education for each child while moving all forward. Understand how to guide their independence, initiative, and skill-building capabilities while building greater connections to others and the world around them. Create a hands-on, self-paced, collaborative, and joyful classroom. AMI training breaks down what great teachers do intuitively into an intentional process you can master to practice education as transformation. The children you guide find their path in life and are truly capable of creating a better world for themselves and others.

AMI training helps you live to teach.

Become an AMI trained Montessori teacher and you'll always be able to teach. Montessori is incredibly popular in both private and public education. In fact, there is greater demand for Montessori schools than there are teachers to fill positions. AMI teacher certification identifies you as a teacher of the highest quality—as someone who is rigorously trained and highly skilled. And, your certification allows you to work as a Montessori teacher anywhere across the country and around the world.

AMI opens a world of professional respect.

Once in the classroom, you'll find parents who respect you as a partner in making sure their child is morally, emotionally, behaviorally, and academically prepared for the real world. You'll find students who are as interested in you as you are in them. And, you'll have a school environment that is intentionally designed to help you be the best possible teacher and mentor.

A variety of opportunities to work with children.

AMI has affiliated training centers around the world, all staffed by highly qualified AMI teacher trainers who ensure fidelity to the highest principles and practices of Montessori. Courses offered prepare you to work with children at the following levels: Infancy (0-3 years); Primary (3-6 years); First Plane (0-6 years); and Elementary (6-12 years). In addition to offering diploma courses for teachers, AMI also provides certificate training for Montessori assistants at all levels.

Become an AMI certified teacher.

Go ahead. Be the teacher you always wanted to be in the school of your dreams. Find an AMI teacher training center at www.montessori-ami.org/training-centres—and learn more about how you can transform lives one child at a time.
